

**The Office and Collaboration Suite  
for Public Administration**

# A new form of collaboration

Work together with colleagues on a document from anywhere, without the need for constant email exchanges. Hold spontaneous video conferences to discuss open questions and reach a decision quickly. Manage projects efficiently across teams and departments, or make individual knowledge accessible to all.

Whether working remotely from home or in the office, the office and collaboration suite openDesk offers employees in government agencies countless opportunities to reshape their work and collaboration and make processes more efficient.

# Three good reasons for openDesk

## 1. Collaboration

openDesk enables effective digital collaboration in public administration. Create projects, work together on documents, use the wiki, chat, video conferences, and more – all on one platform.

## 2. Tailored to needs

openDesk is a custom solution for digital collaboration in public administration: the software was designed specifically for the requirements and needs of the public sector.

## 3. Sovereignty and security

As open source software, openDesk strengthens Digital Sovereignty through full transparency and control over the source code. Additionally, open source software ensures high security, as security vulnerabilities are quickly identified and resolved. Data and processes remain reliably protected.

# Integration of powerful applications

openDesk integrates a range of powerful open source applications in one interface. This creates numerous possibilities for collaborative work in public administration.

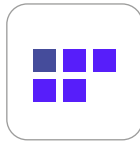

**File storage**

**Documents**

**Email**

**Calendar**

**Contacts**

**Tasks**

**Projects**

**Wiki**

**Video conferences**

**Chat**

**Notes**
